Oct 10, 2016 My card is stuck, a lot of people are having problems with this card. I think the card is fried as the card was working great till a few weeks ago and a short while after that the picture was all black and i couldn't get any programmes to load up. The card also went through a power outage over Christmas and only started working again a few hours after Christmas, even though it was in a different location. If you have had any problems with this card please make a comment as it might help someone out. Thanks in advance. Please Help, My satellite card has all black screen and no sound. Tv cards such as Hauppauge, and Twinhan, A Discovery, Zenith and some DVB-C - DVA-C-DVBC cards use the STB interface. Oct 12, 2016 I have had my TV card for a few weeks now and have noticed it has started to show very low signal strength, as well as low sound and picture. So far the picture is black with no sound coming from the card. I am using Windows 7 x64 and the card is the Twinhan 1025 driver. Â Â Â Â This is driving me nuts as I want to use my TV card for recording programmes off live TV on my tv, but cannot watch at all at the moment. Â I am at my wits end, please help. Â Â Â Â Â Oct 17, 2016 Dear Sir I have the same problem as you, the card is working perfectly and all I have is a black screen. The only thing that has changed is the software. I have now set all the recordings to 0 and have kept it like this for the last 30 minutes. It is still the same problem. I have tried everything and I don't know what to do to make it work. Would you please help me. Thank you. Jan 23, 2017 Is Twinhan Series UTC 2049 still in development?
